## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 6-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Chigawa et al.

Regarding claim 6, Chigawa et al disclose on **figure 31A** that a semiconductor device having bumps 4; a board having pads 6 so that each of the bumps is joined to a corresponding one of the pads, each of the pads having a deformed portion with which a corresponding one of the bumps contact; and an insulating adhesive 7 provided between the semiconductor device and the board, an end of each of the bumps 4 has a diameter smaller than other portions of the bumps;... wherein contraction of the insulating adhesive joints of the bumps and the pads.

Note that the limitation “so as to facilitate deformation of the pad when the bumps are pressed against the pads and to form a space in which the insulating adhesive is filled” and “said joints being made by deformation of the pads” is merely product by process and therefore not given patentable weight.

Regarding claim 7, Chigawa et al disclose on figure 31A that the bumps 4 of said semiconductor device are pressed on the pads 6 of the said board, a portion in which

Art Unit: 2815

each of the bumps and a corresponding one of the pads are in contact with each other ....the insulating adhesive 7 has heating characteristics.... Note that the other portion of this claim that recites product by process and therefore carries no patentable weight.

Regarding claims 8, 9 10 and 11, the claim limitation is merely product by process and not given patentable weight.

### ***Response to Arguments***

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
